

In the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Original) An apparatus for synchronously displaying patterns on panels during testing wherein the panels are driven by a plurality of signal generator (SG) cards, the apparatus comprising:

a synchronization activator generating a first signal;
a pattern selector generating a second signal identifying one of the patterns; and
a controller connected to the SG cards and simultaneously activating the SG cards driving all the panels to display the pattern identified by the second signal when receiving the first signal.

2. (Original) The apparatus as claimed in claim 1 wherein the controller further comprises a BCD control unit connected to the SG cards.

3. (Original) The apparatus as claimed in claim 1 wherein the pattern selector is a BCD keypad.

4. (Original) The apparatus as claimed in claim 1 further comprising a power switch.

5. (Original) The apparatus as claimed in claim 1 further comprising a plurality of power switches for the SG cards.

6. (Previously presented) An apparatus for synchronously displaying patterns on panels during testing wherein the panels are driven by a plurality of signal generator (SG) cards, the apparatus comprising:

a synchronization activator generating a first signal;

a pattern selector generating a second signal identifying one of the patterns, the pattern selector being independently operable from the synchronization activator; and

a controller connected to the SG cards and simultaneously activating the SG cards driving all the panels to display the pattern identified by the second signal when receiving the first signal.

7. (New) The apparatus as claimed in claim 1 wherein at least two panels display the same pattern.

8. (New) The apparatus as claimed in claim 1 wherein all the panels display the same pattern.

9. (New) The apparatus as claimed in claim 7 wherein at least two panels display the same pattern.

10. (New) The apparatus as claimed in claim 7 wherein all the panels display the same pattern.
